Heart health matters,
Let's make it a priority.

**A world free of diabetes isn't our fantasy;
it's our promise.**

Diabetes

LAGLITIN-M 2.5/500 & 2.5/1000

Linagliptin 2.5 mg & Metformin Hydrochloride 500/1000 mg

LAGLITIN-M 2.5/500 & 2.5/1000 is a combination of Linagliptin 2.5 mg & Metformin Hydrochloride 500/1000 mg.

INDICATIONS:

- Type 2 Diabetes
- Prevent kidney damage
- Prevent blindness
- Prevent nerve problems
- Prevent loss of limbs
- Prevent sexual function problems

Also Available:

Laglitin 5

Linagliptin Tablets 5 mg

Laglitin-5 D10

Dapagliflozin 10mg + Linagliptin 5 mg Tablet

MECHANISM OF ACTION:

Linagliptin -It works by increasing the amount of insulin that the body makes.

Metformin Hydrochloride - It works by decreasing the absorption in the intestine and the production of sugar by the liver.

DOSAGE:

1 Tablet containing 2.5-5 mg of linagliptin and 500-1000 mg of metformin 2 times a day. Doctor may gradually increase dose until blood sugar is controlled.

Healthy Heart, Healthy You

VALSISAC 49/51 & 24/26

Sacubitril 49/24 mg + Valsartan 51/26 mg Tablets

VALSISAC 49/51 & 24/26 (Sacubitril + Valsartan) is a combination drug mainly used in heart failure.

INDICATIONS: Chronic heart failure & congestive heart failure

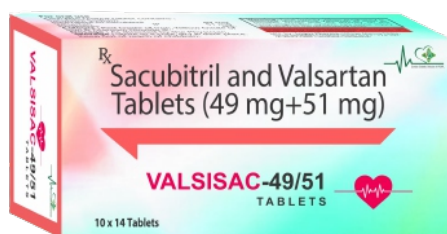

HOW IT WORKS:

SACUBITRIL is a Neprilysin inhibitor, it blocks the breakdown of natriuretic peptides produced in the body.

Natriuretic peptides cause sodium and water to pass into the urine. This effect reduces the work on the heart and reduces blood pressure.

VALSARTAN is an Angiotensin receptor Blocker (ARB), it relaxes and widens the blood vessels that lowers blood pressure and makes it easier for the heart to pump blood around the body.

The combined effect of the two medicines reduces the strain of the failing heart.

DOSAGE: Tablet twice a day or as directed by the Physician.
